

Finger Guardian Installation Sheet

Tools & Equipments

- Pencil.
- Clean Cloth.
- Degreaser.
- Hacksaw.
- Scissors or Knife.
- Screwdriver.
- Drill.

Introduction

If you need to cut to length leave 4 clearance top and bottom. Use hacksaw to cut rigid profiles and sharp scissors or knife to cut flexible shield.

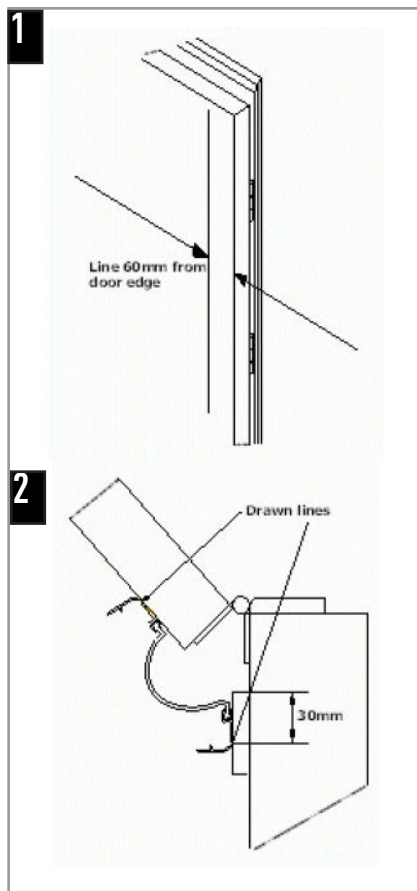

Ensure that the surfaces that the adhesive tape is to adhere to are free of dust or grease.

Please note that double sided tape is only a fitting aid and Finger Guardian should be fixed using screws provided before the guard is ready for normal operation.

Finger Guardian Installation Sheet

Installation

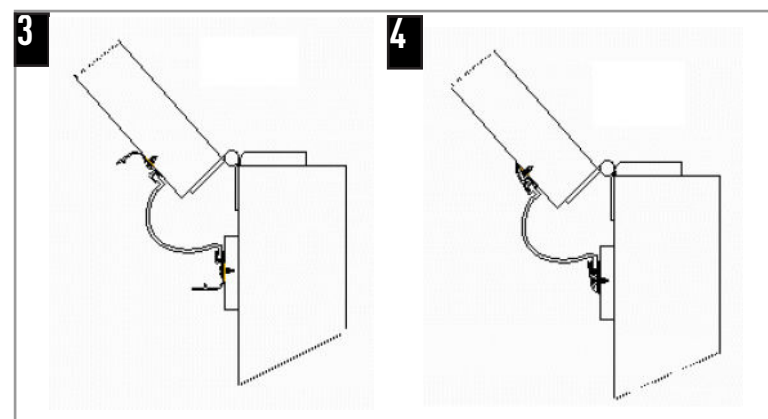

1. Draw a line vertically down the door 60mm from the hinge edge.

2. Remove tape backing from door side rigid profile and stick in position with outer edge on drawn line. Remove tape backing from other rigid profile and stick in position on door jamb.

3. Unclip the cover strips and using the screws provided fix both sides of Finger Guardian in position with screw every 6" and with one no more than 10" away from top and bottom. Mount 5mm from floor.

4. Clip screw cap cover in place. Finished.

Storage & Disposal

Finger Guardian should be stored in indoors. No shelf life is given as this product will not deteriorate in storage.
