

Finger Keeper Industrial Installation Sheet

Tools & Equipments

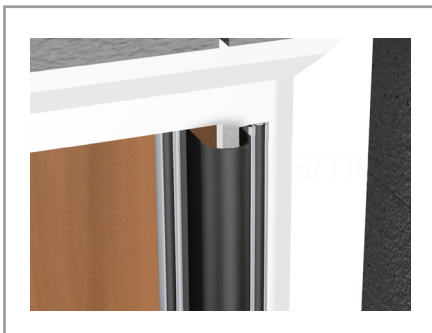

- Tape Measure.
- Table Saw.
- Hand File.
- Stanley Knife.
- Screw Driver.
- Drill.
- Carpenter Pencil.
- Claw Hammer

Introduction

Finger Keeper Industrial is a heavy duty finger-pinch protection device (anti-finger-trapping hinge guard) manufactured from Black EPDM fitted in an Anodised aluminium carrier, that has black inserts to conceal the fixing screws.

The EPDM safety strip prevents fingers being pinched on the hinge side of a door. It is fixed to the door and the jamb on the hinged side.

Location: Butt hinged or centre pivot door.
 Anodised satin clear. Reversible brown and white PVC barrier.
 Zinc plated, cross recess head S.T. screws of the appropriate size are supplied. Fixing holes are slotted. Push in cover strip.

Finger Keeper Industrial Installation Sheet

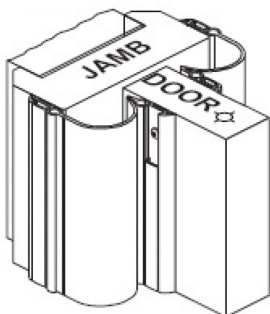

Installation

1

1. Remove plastic coverstrips. Fold FKI so aluminium meets together ensuring desired colour is facing outwards, if not remove PVC barrier, rotate and replace into aluminium. Clamp FKI and machine cut the aluminium and the PVC to size. Neatly biff or centre punch back side of aluminium to lock in PVC barrier preventing movement.

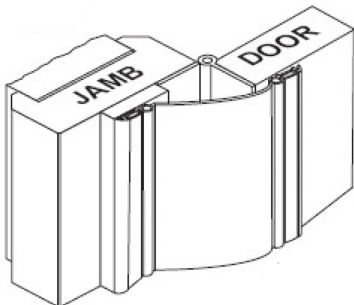

2

2. Two FKI's are required for pivot doors.

3. With door fully open, position one side of FKI on door face. Check to make sure other side of FKI will reach door jamb or stop. Lightly screwfix in centre of every slot. Position other side of FKI on door stop or jamb. Lightly screwfix in centre of every slot.

3

4. Open and shut the door to check for correct latching. Adjust FKI if needed. Tighten all fixing screws.

5. Measure and cut coverstrip to size. Push in the cover strip. Neatly biff of centre punch each end of aluminium to lock in coverstrip preventing movement.

- Can be cut to length required. (82.7" max.)
- Screws are supplied.
- Fixing holes are slotted.
- Push in cover strip.

Storage & Disposal

Finger Keeper Industrial should be stored in indoors. No shelf life is given as this product will not deteriorate in storage.
