

Finger Protecta

Scope of Supply

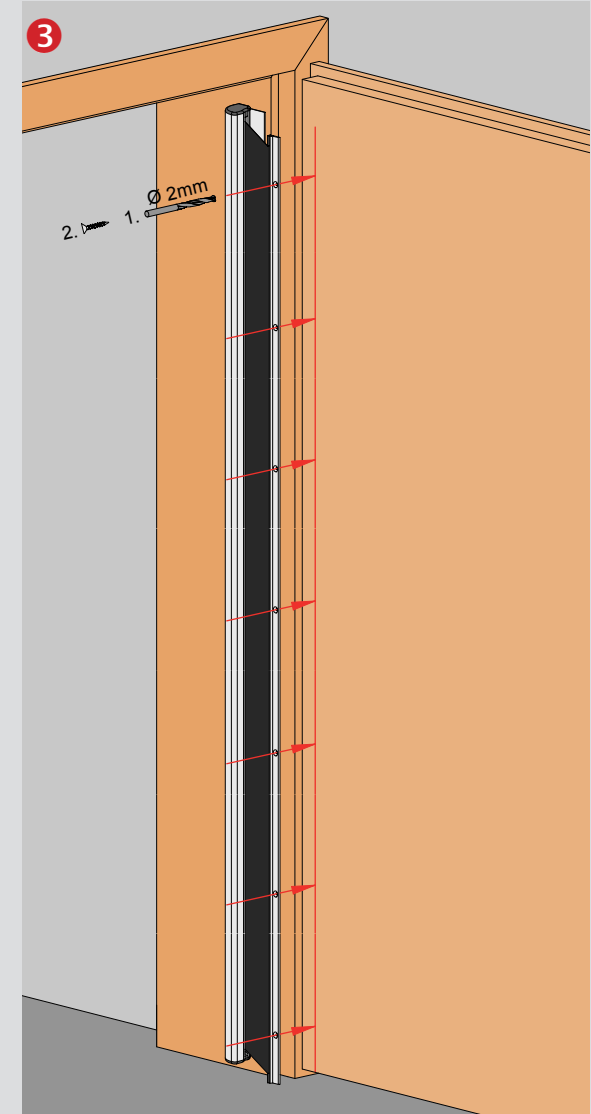

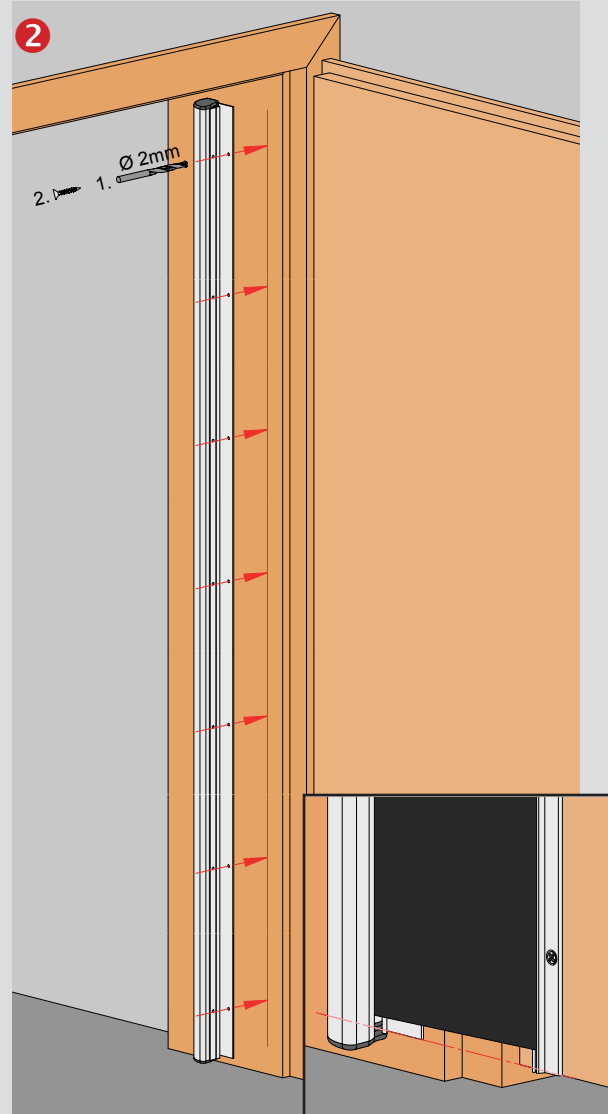

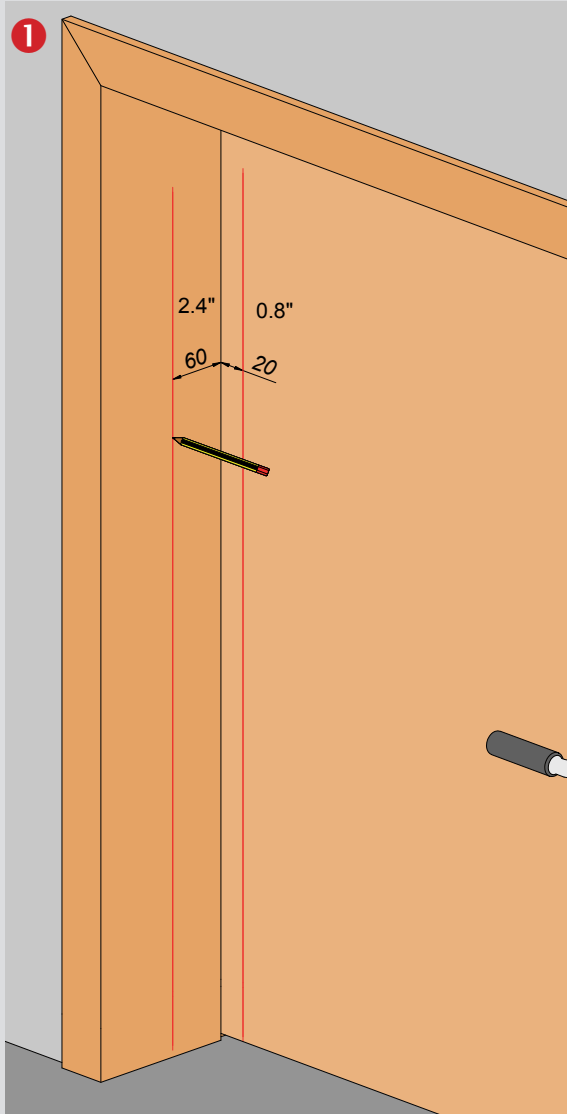

8 X

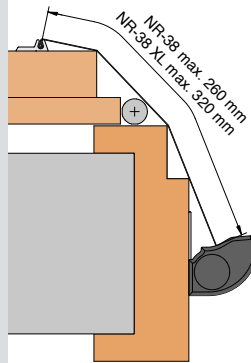

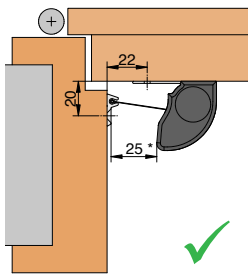

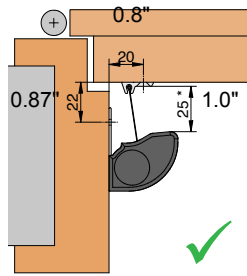

8 X

Assembly

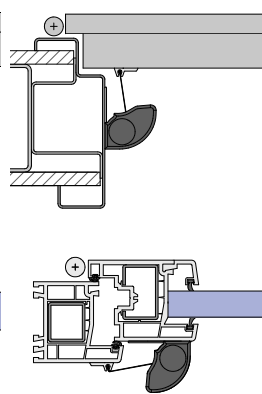

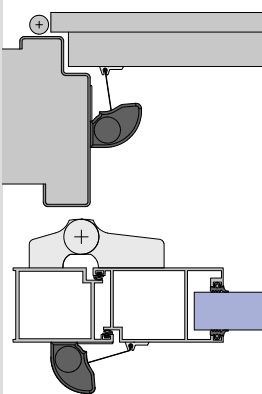

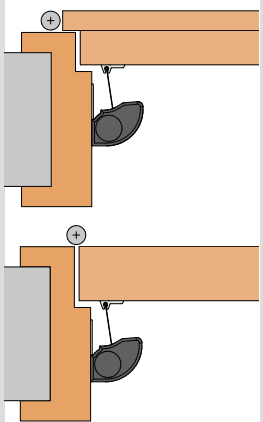

Application

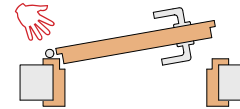

10.2"
12.6"

* 25 mm minimum distance required.
According to DIN EN 349.

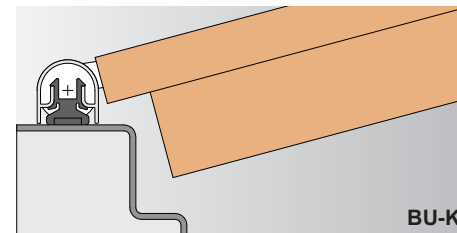

Screws are included for
wooden doors only.

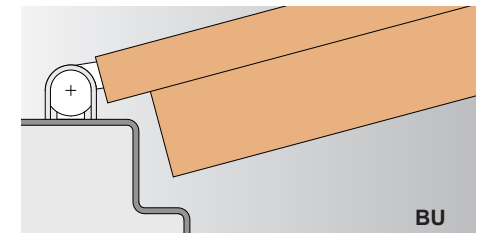

Screws for metal- and plastic doors must be provided on site.

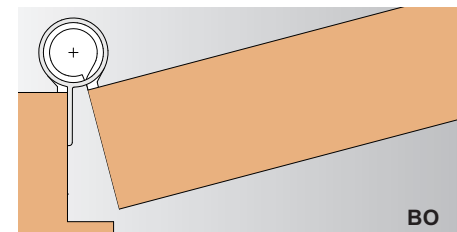

To ensure a complete protection of the
auxiliary edge of a door, also the
protection of the hinge side is essential.
For this we recommend the protective
profiles at the hinge side as a set. The set
contains a profile for the protection of the
part between the hinges and one for the
protection of the part below the lower
hinge.
